Subject: Draft Residual Risk Assessment Approach for the Revised FS
Attachments: LWG - Draft Residual Risk Assessment Approach_9-3-2014.pdf

Kristine,

The following email is provided on behalf of Carl.

Kristine –

Please find attached a document presenting a Residual Risk Assessment Approach for the revised FS. This document is being provided as part of the informal non-binding FS technical discussion process. This document was prepared per Action Item number 4 from the April 15, 2014 FS technical meeting, as listed in the action items lists that we provide each Friday. As you recall, this action item was generated based on an EPA statement during the meeting inviting LWG to consider whether a residual risk assessment in the revised FS might help resolve some of the LWG's concerns regarding evaluations of PRGs on appropriate spatial scales. As described in the attached document, we also think that residual risk estimates will assist in the FS comparisons of remedial alternatives and in the determination of the efficacy of the preferred remedy.

We would be happy to go over this approach in more detail with you at your earliest convenience.

Thanks.

Carl

Thank you,
Jen Woronets ☺
